@GIEBrussels

Gas Infrastructure Europe (GIE)

GIE is the association representing the sole interest of the infrastructure industry in the natural gas business such as Transmission System Operators, Storage System Operators and LNG Terminal Operators.

GIE currently has 67 members in 27 European countries.

GIE MEMBERS

European Biogas Association (EBA)
Rue d'Arlon 63-65

@European_Biogas

European Biogas Association (EBA)

EBA is the voice of renewable gas in Europe. Founded in February 2009, the association is committed to the active promotion of the deployment of sustainable biogas and biomethane production and use throughout Europe, thereby also contributing to a well-functioning network of over 200 national organisations, scientific institutes and companies from Europe and beyond.

EBA NATIONAL ASSOCIATIONS

EBA STANDARD MEMBERS

BIOMETHANE DATA LEGEND

Country - Facility number

- 003 Plant injecting into / connected to the grid
- 000 Plant not injecting into / connected to the grid
- 000 grid connection status not known

AT-1 Asten / Linz 450 2010

- Start of operation
- Biomethane Production Capacity [m³/h]
- Location of biomethane production facility

MAP LEGEND

- European country producing biomethane
- Not producing biomethane / no data available

Cross-border / interconnection points

- operational
- planned

Cross-border interconnection point
Intra-country or intra balancing zone point

Transport by pipeline

- under 24"
- 24" to 36"
- 36" and over
- project

Gas Reserve areas — drilling platform — gas field

The European biomethane market

Europe reaches a total of 1,023 biomethane producing facilities by October 2021. Of those, 994 plants were located by the EBA and displayed on this map. Compared to the previous editions of the European Biomethane map, the number of plants in Europe have steeply increased (483 plants in the 2018 edition and 729 in the 2020 edition).

Biomethane production has enjoyed remarkable growth in the last decade. Whereas 2021 figures are not yet fully consolidated, 2020 saw the biggest year on year increase in biomethane production so far, reaching a total of 32 TWh of biomethane in Europe. The growth in production in 2020 was in fact double the growth of the year before and for the year 2021 an even bigger increase is to be expected. A record number of new biomethane plants started production in 2020 and are expected to have been fully operational during 2021.

47% of the biomethane plants currently active in Europe are known to be connected to the distribution grid and 20% are known to be connected to the transport grid. 10% of European biomethane plants do not have a grid connection and for the remaining 23% of Europe's plants no information is available.

Figures presented below and on the European Biomethane map originated from the EBA database. A full elaboration of the biogas and biomethane markets can be found in the EBA statistical report 2021.

Biomethane production in TWh

DATA SOURCES

All data provided on this map is for information purposes and shall be treated as indicative only. Under no circumstances shall it be regarded as data intended for commercial use. This map has been built with support of the EBA members and colleagues who have provided the necessary data. Sources for each country are listed below.

Data is covering active facilities only in operation by October 2021.
Many more are planned or under construction.
Additional information is available in the EBA statistical report 2021.
